

Policy 1: Wildlife Conservation and Biodiversity Protection Policy

1. Policy Statement:

The Wildlife Conservation and Biodiversity Protection Policy of TANAPA reaffirms our commitment to safeguarding wildlife and promoting biodiversity conservation. We recognize that the natural world is interconnected, and the well-being of wildlife is crucial for maintaining ecological balance and preserving the planet's rich biodiversity. This policy outlines our comprehensive approach to minimizing negative impacts on wildlife and ecosystems while actively participating in conservation efforts.

2. Compliance with Applicable Laws and Regulations:

At TANAPA, we strictly adhere to all relevant local, national, and international laws, regulations, and treaties related to wildlife conservation and biodiversity protection. We recognize the importance of meeting legal requirements and obtaining the necessary permits and authorizations when operating in areas with sensitive wildlife habitats.

3. Habitat Protection and Restoration:

We understand that habitats are vital for the survival of wildlife, and therefore, we are committed to identifying and prioritizing conservation areas within our operational scope. Our aim is to minimize our ecological footprint and avoid encroaching upon critical wildlife habitats. In areas where our operations have had an impact, we will actively participate in habitat restoration efforts and collaborate with local conservation organizations to protect and rehabilitate ecosystems.

4. Sustainable Resource Use:

We recognize that our business activities can have implications on wildlife and biodiversity. To mitigate these impacts, we will adopt sustainable practices in our operations. This includes sourcing raw materials responsibly, reducing waste generation, minimizing pollution, and promoting eco-friendly processes throughout our supply chain.

5. Education and Awareness:

We understand the importance of fostering a conservation-oriented culture within our company. Therefore, we will promote awareness among our employees, partners, and stakeholders about the significance of wildlife conservation and biodiversity protection. Regular training programs and workshops will be organized to enhance understanding and encourage active participation in conservation efforts.

6. Wildlife-Friendly Design and Development:

When designing or developing new products, services, or infrastructure, we will proactively consider the potential impact on wildlife and take measures to minimize negative effects. This may involve employing wildlife-friendly architecture, incorporating wildlife corridors into our developments, or using materials that are non-intrusive to wildlife habitats.

7. Collaboration and Advocacy:

We acknowledge that addressing wildlife conservation and biodiversity protection requires collective action. Therefore, we will actively engage with relevant stakeholders, such as government agencies, non-governmental organizations (NGOs), and local communities, to support and participate in wildlife conservation initiatives. Additionally, we will advocate for wildlife protection and biodiversity conservation in the broader business community, encouraging industry-wide sustainable practices.

8. Monitoring and Reporting:

To ensure the effectiveness of our wildlife conservation efforts, we will establish robust monitoring mechanisms. Regular assessments will be conducted to evaluate the impact of our policies and practices on wildlife and biodiversity. Progress reports will be shared with employees and stakeholders to maintain transparency and accountability.

9. Non-Tolerance of Wildlife Trafficking and Poaching:

TANAPA strictly condemns any involvement in wildlife trafficking and poaching activities. We will not support or engage in any trade of endangered species, their parts, or products derived from them. Furthermore, we will cooperate with law enforcement agencies and conservation organizations to combat such illegal activities.

10. Continuous Improvement:

We recognize that wildlife conservation is an ongoing and evolving process. As such, we will continuously review and improve our wildlife conservation policies and practices, incorporating advancements in conservation science and technology. We will strive to be at the forefront of responsible and sustainable practices, setting an example for others in the industry.

By adhering to this Wildlife Conservation and Biodiversity Protection Policy, TANAPA aims to make a positive contribution to wildlife preservation and the broader ecosystem, demonstrating a strong commitment to environmental stewardship and sustainability.
